Profile

Flutter Developer with 3+ years of experience in designing, developing, and deploying scalable cross-platform mobile applications using Flutter and Dart. Strong expertise in state management (Provider, GetX, BLoC), REST API integration, and Firebase services including Authentication, Firestore, Realtime Database, Cloud Functions, Storage, and Push Notifications. Experienced in managing the complete application lifecycle from requirement analysis and UI implementation to Google Play Store and Apple App Store deployment. Seeking a challenging Flutter Developer role to leverage expertise in mobile architecture, performance optimization, and clean code practices to deliver high-quality, production-ready applications.

Work Experience

Freelance Flutter Developer | School Diary App | Jul 2025 – Jan 2026

- Developed a cross-platform School Diary application to streamline communication between parents and teachers.
- Designed and implemented complete application architecture using Flutter and structured state management.
- Integrated REST APIs for backend communication and structured data handling using JSON parsing.
- Developed responsive UI components ensuring compatibility across multiple screen sizes and devices.
- Scalable White-Label Architecture: Developed a multi-tenant system using Flutter Flavors and build-time configurations, enabling the seamless deployment of personalized app instances (unique branding, icons, and subdomains) for multiple schools from a single codebase.
- Robust State Management with BLoC: Implemented the BLoC (Business Logic Component) pattern to decouple complex business logic—such as academic reporting and payment processing—from the UI, ensuring a highly testable and predictable application state.
- Real-Time Engagement & Notifications: Integrated Firebase Cloud Messaging (FCM) to facilitate instantaneous Teacher-to-Parent communication, providing parents with real-time alerts for student progress updates and urgent school announcements.

Flutter Developer | IMIT Park, Irinjalakuda, Thrissur | Nov 2022 – Mar 2025

- Managed end-to-end mobile application development lifecycle from requirement analysis to deployment.
- Developed and maintained scalable Flutter applications for Android and iOS platforms.
- Implemented advanced state management solutions using Provider, GetX, and BLoC.
- Integrated RESTful APIs and third-party services to enable dynamic data-driven applications.
- Configured Firebase services including Authentication, Firestore, Cloud Functions, Storage, and Push Notifications.
- Designed reusable UI components and ensured consistent UI/UX standards across applications.
- Implemented local storage solutions using SharedPreferences and Hive.
- Performed performance tuning, code refactoring, and memory optimization to enhance application stability.
- Collaborated with cross-functional teams including backend developers and designers in Agile environment.
- Managed application builds and deployment to Google Play Store and Apple App Store.

Education

- **Bachelor of Commerce (BCom)** | Calicut University | Jun 2017 – Mar 2020

Projects

Ardram Application

- Community-funded mobile application providing financial assistance for essential medicines.
- Implemented backend integration and real-time data workflows.
- Developed structured modules to manage contributors and beneficiaries.

Navasankalp Application

- Information and community engagement application for Kerala Congress.
- Developed modules for news updates, event tracking, and user participation.
- Integrated Firebase for dynamic content and real-time updates.

Irinjalakuda Khadi (E-commerce)

- E-commerce mobile application for selling Khadi products.
- Implemented product catalog, data management, and API integration.
- Designed responsive UI and optimized user navigation flow.

Red Cross Application

- Organizational mobile application for Kerala Red Cross students.
- Developed modules for activity tracking, meeting notifications, and information sharing.
- Integrated real-time database features for live communication.

Core Competencies and Skills

- **Flutter Application Development** – Developing scalable cross-platform mobile applications for Android and iOS using Flutter framework.
- **Dart Programming** – Writing efficient, maintainable, and object-oriented code using Dart for mobile application development.
- **Mobile Application Architecture** – Designing clean, modular, and scalable application structures following best coding practices.
- **State Management (Provider | GetX | BLoC)** – Implementing structured state management solutions to ensure optimized UI updates and application performance.
- **RESTful API Integration** – Integrating and consuming REST APIs with proper request handling and JSON data parsing.
- **Firebase Services** – Configuring and managing Firebase Authentication, Firestore, Realtime Database, Cloud Functions, Storage, and Push Notifications.
- **Responsive UI Design** – Building adaptive and device-compatible user interfaces with reusable widgets and consistent layouts.
- **Performance Optimization** – Improving app speed, reducing rebuild cycles, and optimizing memory usage for stable performance.
- **Local Storage (SharedPreferences | Hive)** – Implementing secure and efficient local data persistence solutions within applications.
- **Version Control (Git)** – Managing source code repositories, branching strategies, and collaborative development workflows.
- **Agile Methodology** – Working in Agile and Scrum environments with iterative development and sprint-based delivery.
- **Debugging And Testing** – Identifying, troubleshooting, and resolving application issues to ensure production stability.

Languages

- **English | Malayalam**
